

1. Who can participate in the program?

Anyone who is a current patient of a health care professional that offers Standard Process products may apply. Just ask your health care professional for the office's unique Patient Direct code. You will need it for your application.

2. Why do I have to be approved as a current patient by my health care professional?

This program was designed to offer patients the convenience of 24/7 ordering while still maintaining the health care professional-patient relationship. Only your health care professional knows your personal nutritional needs. As a current patient you get recommendations from an expert who will make sure you are getting the right supplements. Your health care professional will explain situations in which a supplement should not be used and help you avoid the dangers of guessing or self-diagnosis.

3. What if my health care professional doesn't participate in the Patient Direct program?

Download the Patient Direct brochure, and take it to your health care professional. Share your interest in ordering online for direct delivery to your home.

4. What if I don't have a health care professional?
